

Technical Specifications

Introducing the most comprehensive alcohol offender supervision and monitoring system available anywhere in the world today.

R.A.D.A.R. mobile remote alcohol offender supervision system provides:

- Dual, independent biometric technology for immediate user identification/confirmation
- Immediate CDMA reporting and confirmation of user identity
- Meets or exceeds Department of Transportation standards
- Easy to utilize, transport and ship
- Military grade 256-bit encryption for data communications
- GPS location fix for every test, positive or negative
- Reporting center software provides reports in MS Word, Excel, and PDF formats
- Multiple testing capabilities: scheduled, on-demand, random, self-initiated
- Web-enabled software platform

This fuel-cell based, breath-alcohol testing system incorporates a number of safeguards to prevent tampering and provides accurate, actionable, alcohol alerts. All breath-alcohol tests are time stamped and include a GPS fix. The web-enabled Reporting Center assures testing compliance.
